

**Summary of Reasons Supporting the Adoption of the Proposed  
Amendments to the Alabama Department of Environmental  
Management's Administrative Code for division 335-3 (Air Division)**

The revisions to division 335-3 are being proposed to incorporate by reference changes to the EPA's New Source Performance Standards (NSPS), and National Emissions Standards for Hazardous Air Pollutants (NESHAPs) promulgated by the Environmental Protection Agency (EPA) from July 3, 2007, to July 17, 2008. Revisions are also being proposed to incorporate revisions made by EPA to the Transportation Conformity Rule.

**Revisions to Chapter 335-3-10**

EPA has set emission standards, notification and testing procedures, and monitoring requirements for a number of individual industrial sources or source categories. Standards of performance are not intended to achieve any specific air quality level. Instead, they are designed to reflect best-demonstrated technology (taking into account costs) for the source in question. New source performance standards apply only to stationary sources that are constructed, modified, or reconstructed after a relevant standard is established. In 1978, EPA published a list assigning priorities to 72 categories of sources for which new standards eventually would be developed. As soon as new standards are promulgated, facilities planning construction, reconstruction, or modification must comply.

ADEM incorporates by reference, the federal New Source Performance Standards (NSPS) into the Department's regulations concerning Air Pollution found in ADEM Admin. Code div. 335-3. This incorporation allows the EPA to delegate administrative enforcement of these regulations to ADEM.

EPA reviews its promulgated NSPS regulations periodically and makes revisions to the regulations or test procedures as technology advances. This revision by EPA subsequently requires ADEM to revise its existing regulations, as well as adopt new NSPS categories promulgated by EPA, to keep ADEM's NSPS delegation current. ADEM proposes to revise chapter 335-3-10 to incorporate the rules as described below which have been promulgated since ADEM's last rulemaking procedure.

**Update of Continuous Instrumental Test Methods: Technical Amendments**

**SUMMARY:** EPA corrected errors in a final rule published May 15, 2006, that updated five continuous instrumental test methods. As published, the rule contained inadvertent errors and provisions that needed to be clarified. EPA published a direct final rule with a parallel proposed rule on September 7, 2007, to correct the errors and to add clarifying language. However, EPA received an adverse comment on the direct final rule, and it was subsequently withdrawn on November 5, 2007. This action corrects errors and clarifies certain provisions.

**Standards of Performance for Petroleum Refineries**

**SUMMARY:** EPA issued final amendments to the current Standards of Performance for Petroleum Refineries. This action also promulgates separate standards of performance for new, modified, or reconstructed process units at petroleum refineries. The final standards for new process units include emissions limitations and work practice standards for fluid catalytic cracking units, fluid coking units, delayed coking units, fuel gas combustion devices, and sulfur recovery plants. These final standards reflect demonstrated improvements in emissions control technologies and work practices that have occurred since promulgation of the current standards.

**Revisions to Chapter 335-3-11**

ADEM proposes the addition of and technical amendments to rules in chapter 335-3-11. These rules will incorporate regulations in 40 CFR Part 63 (National Emission Standards for Hazardous Air Pollutants (NESHAPS) for Source Categories) and 40 CFR Part 61 (NESHAPS) by reference, into the state regulations.

The Environmental Protection Agency (EPA), in accordance with Section 112 of the Clean Air Act (CAA) as amended in 1990, is required to issue emission standards for all major sources of the 188 listed hazardous air pollutants. On July 16, 1992 [57 FR 31576], the EPA published an initial list of source categories for which air toxics emission standards are to be promulgated. By the year 2000, the EPA was required to develop rules for all of these categories that require maximum achievable reduction in emissions, considering cost and other factors. These rules are generally known as “maximum achievable control technology” (MACT) standards. On December 15, 1995 [60 FR 57346] under Section 112(l)(5) and 40 CFR 63.91, the EPA granted full approval to the State of Alabama for the State’s program for receiving delegation of Section 112 standards that are unchanged from Federal rules as promulgated.

This Chapter is periodically updated to incorporate standards for additional source categories as they are promulgated by the EPA.

**Amendments to National Emission Standards for Hazardous Air Pollutants for Primary Copper Smelting and Secondary Copper Smelting Area Sources**

**SUMMARY:** EPA amended the national emission standards for primary copper smelting area sources and secondary copper smelting area sources published on January 23, 2007. The amendments to the national emission standards for primary copper smelting area sources clarify when plants must exhaust gases to a control device and what control devices may be used for this requirement; numbering errors are also corrected. The amendments to the national emission standards for secondary copper smelting area sources clarify the date which defines a new copper smelter and correct a cross referencing error.

**NESHAP: National Emission Standards for Hazardous Air Pollutants:  
Standards for Hazardous Waste Combustors**

**SUMMARY:** EPA finalized amendments to the national emission standards for hazardous air pollutants (NESHAP) for hazardous waste combustors, which EPA promulgated on October 12, 2005. The amendments to the October 2005 final rule clarify several compliance and monitoring provisions, and also correct several omissions and typographical errors in the final rule. EPA finalized the amendments to facilitate compliance and improve understanding of the final rule requirements. This rule does not address issues for which petitioners sought reconsideration. Nor does it address issues raised in EPA's comment solicitation of September 27, 2007.

**National Emission Standards for Hazardous Air Pollutants: Organic

**SUMMARY:** EPA took action on the national emission standards for hazardous air pollutants for organic liquids distribution (non-gasoline), which EPA promulgated on February 3, 2004, and amended on July 28, 2006. In this action, EPA clarified combustion control device compliance requirements, certain storage tank control compliance dates, and vapor balance system monitoring requirements. In addition, EPA corrected typographical errors found in the July 28, 2006, final rule amendments.

**National Perchloroethylene Air Emission Standards for Dry Cleaning  
Facilities**

**SUMMARY:** EPA published a direct final rule and parallel proposal on April 1, 2008, to amend revisions to the national perchloroethylene air emission standards for dry cleaning facilities which EPA promulgated on July 27, 2006. Because EPA received adverse comment during the comment period on the direct final rule and parallel proposal, EPA withdrew the direct final rule and took final action on the proposed rule to reflect their response to the comments.

**National Emission Standards for Hazardous Air Pollutants: Organic Liquids Distribution (Non-Gasoline)**

**SUMMARY:** EPA published proposed and direct final rule amendments on April 23, 2008, of the national emission standards for hazardous air pollutants for organic liquids distribution (nongasoline), which EPA promulgated on February 3, 2004, and amended on July 28, 2006. Because adverse comments were received on two of the April 23, 2008, proposed and direct final rule amendments, EPA withdrew the two corresponding regulatory amendments in the direct final rule before they became effective on July 22, 2008. The other regulatory amendments discussed in the direct final rule, for which EPA did not receive any adverse comments, will become effective on July 22, 2008, as stated in that notice. In addition, in this action EPA promulgated final rule amendments regarding the provisions that were commented upon and withdrawn, and responded to the adverse comments they received. Additionally, EPA corrected typographical errors identified in other sections of the rule text that were not addressed in the April 23, 2008, notices.

**Transportation Conformity Rule Amendments to Implement Provisions Contained in the 2005 Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU)**

**SUMMARY:** EPA amended the transportation conformity rule to finalize provisions that were proposed on May 2, 2007. The Clean Air Act requires federally supported transportation plans, transportation improvement programs, and projects to be consistent with (“conform to”) the purpose of the state air quality implementation plan. Most of these amendments are necessary to make the rule consistent with Clean Air Act section 176(c) as amended by SAFETEA-LU on August 10, 2005 (Pub. L. 109-59), including changes to the regulations to reflect that the Clean Air Act now provides more time for state and local governments to meet conformity requirements, provides a one-year grace period before the consequences of not meeting certain conformity requirements apply, allows the option of shortening the timeframe of conformity

determinations, and streamlines other provisions. This final rule also includes minor amendments that are not related to SAFETEA-LU, such as allowing the Department of Transportation (DOT) to make categorical hot-spot findings for appropriate projects in carbon monoxide nonattainment and maintenance areas.
