

Don't waste our waterways

Since 1993, the year the Alabama Clean Vessel Act was passed, more than \$500,000 in grants have been awarded to help marinas install boat sewage pumping stations in an effort to reduce sewage dumping and protect Alabama waters.

The stations are easy to use and conveniently located. Some stations offer special

wand attachments to make pumping waste even cleaner and more efficient. And, marinas offering pumping stations are clearly marked with the recognizable orange and white pumping signs.

Please make every effort to use these stations to dispose of your waste materials, and do your part to help keep Alabama's waterways clean and safe.

For more information and a list of station locations, go to

www.adem.state.al.us

or call the Alabama Department of
Environmental Management at

1-800-533-2336.

Pump, Don't Dump

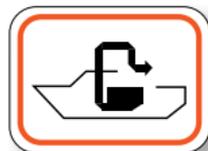

Do your part to help keep Alabama's waterways clean and safe: don't dump waste materials from portable toilets into the water.

Not only is dumping waste a violation of state water regulations and you can be cited, but it can severely damage the quality of the water and the wildlife that lives there, and spread disease.

Sure, it's no big deal if one boater does it. But did you know that over a million households in Alabama have some kind of watercraft? Do you want to swim in or eat fish from water contaminated by the waste of more than one million boaters? Probably not.

Which is why you should dump your waste materials at pumping and dump stations conveniently located at numerous marinas throughout Alabama.

**Keep Our
Water Clean—
Use Pumpouts**
